

## QuBits by ICFOnians at the exhibition *Quantum by CCCB*

## SESSIONS

**12/04 - 18:00**

***What do we mean when we speak of quantum physics?***

**Prof. Dr. Maciej Lewenstein**

The ICREA research professors Maciej Lewenstein (ICFO-UPC) and David Mateos (ICCUB) will talk about quantum physics, explaining why it has shaken up our understanding of nature and revealing which aspects of the theory are still a mystery.

**13/04 - 12:00**

***Decide Game: Quantum Technologies***

**ICFO Outreach Team**

A card game to bring the public closer to the principles of quantum physics and the impact on our way of understanding the world.

**13/04 - 18:00**

***A quantum future: the next technological revolution?***

**Prof. Dr. Antonio Acín**

The ICREA research professors Aurelio Juste (IFAE-UAB), Clivia Sotomayor (ICN2-UAB), and Antonio Acín (ICFO-UPC) will discuss the technology that has been developed thanks to quantum physics while also considering the point we are at now with regard to a new technological revolution.

...and much more!

In the part of the exhibit dedicated to randomness, you will find the chip developed by Quside, one of ICFO's spin-off companies.
